Sentiment analysis tools

Crowd Psychology Scores

Social Sentiment

Self-learning algorithms

Accurate learning

Predictive outputs

## We take the lead!

- Tier systems
- API for Quant and Algorithmic Traders
- Gas fee reimbursement
- Incentives Model
- Decentralized Automated Trading

## Business model

**Tier Programs:** The Company has a tier plan that will help them tailor services for the different sections of their customers. The tiers can be classified as:

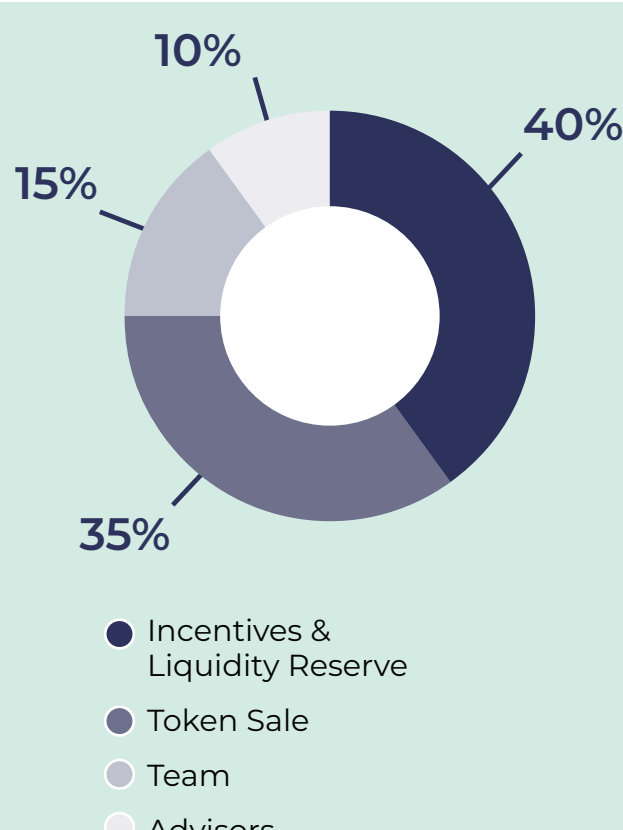

Tier 1	STANDARD	Fee
	<ul style="list-style-type: none"> <li>Normal trading tools</li> <li>Limited access to sentiment analysis tools</li> <li>Sentiment &amp; AI for 30 tokens only</li> </ul>	Free for Everyone
Tier 2	ULTIMATE	Fee
	<ul style="list-style-type: none"> <li>Complete Sentiment analysis tools</li> <li>Sentiment analysis scores &amp; graphs</li> <li>Interactive AI predictive tools</li> <li>Analysis for all tokens supported</li> </ul>	\$15/month or through the Affiliates program
Tier 3	AUTOMATION	Fee
	<ul style="list-style-type: none"> <li>Complete access to MQ features</li> <li>Access to Quboid capabilities</li> <li>Access to trading algorithms</li> </ul>	\$30/month or through the Affiliates program
Tier X	PARTNER	Access to Tier X is done manually through a selection process undertaken by management
	<ul style="list-style-type: none"> <li>Access to all MQ features</li> <li>Profit sharing on trades</li> <li>Registered Market Makers</li> <li>Quant and Algo traders</li> </ul>	

## Token Economics

A token is only as good as its utility use-cases, and the demand it achieves vs the supply. When it comes to the Meterqubes token, there are quite the utility use cases that are involved where the token will be used for:

- Discounts on the trading fees
- Use in the AI-predictive features
- Used to access the advanced Sentiment analysis tools
- Used to pay affiliates and market makers
- Used to reimburse gas payments to traders

## Roadmap
